■ Operations:

Asset Management:

Recommends to the Board of Transportation the distribution of Maintenance and Resurfacing Funds across 14 Divisions and 100 counties. Manages and supports the following central units: Bridge Management, Equipment & Inventory Control, Construction, Intelligent Transport Systems, Materials & Tests, Oversize/Overweight Permits, Pavement Maintenance, Roadside Environmental, Secondary Roads

Bridge Management Unit:

Responsible for the inspection, analysis, inventory, and administration of maintenance policies and procedures for all structures on the State Highway System.

Pavement Management Unit:

Provides adequate and economical designs for new pavements and rehabilitation designs. Maintains records of pavement history, service life, skid, profile, features and conditions of existing paved roadways.

Equipment and Inventory Control Unit:

Supports the DOT's equipment and material needs for the operation of the state's transportation system.

Roadside Environmental Unit:

Provides roadside elements for a state highway system that is safe, environmentally sound, attractive and responsive to the public's needs. Programs of interest include NC Wildflower, NC Scenic Byways, Adopt-A-Highway, Wildlife Habitat and

Intelligent Transportation Systems (ITS) Unit: Manages and maintains the State's Travel Information

System. Provides incident management services for the

Secondary Roads Unit: Maintains the inventory of Secondary roads, paved and unpaved roads, on the NCDOT system. Manages priority status for unpaved roads to be paved and respond to the public's inquiries regarding additions and deletions of roads to the State maintained system.

Oversize/Overweight Permits Unit:

Processes applications and issues permits for oversize/overweight vehicles. The Permit Unit also furnishes lists of restricted routes and permit information to the general public.

State Road Maintenance Unit:

Implements and manages programs for maintaining roads on the NCDOT system.

Field Operations oversees the Construction Unit, Materials and Tests Unit and the 14 Division offices across North Carolina.

Construction Unit:

Provides oversight and administration to highway construction projects under private contract. This office ensure adequate staffing, monitors and evaluates contractual agreements, and works closely with the Federal Highway

Materials and Tests Unit:

Responsible for determining the quality of materials and products incorporated into the Transportation System. The Unit manages the training and certification of technicans and approves products for use and provides expertise to field personnel.
